

# Sean Miller Continuity vs. Trapping 1-3-1

2 and 3 work to get open  
5 is ballside on the diagrams but staying on the weakside is fine for a diagonal pass through the zone

2 swings to 4 (should be wide open)  
3 flashes middle  
If x4 takes away 4 - 3 is open

If 2 passes back to 1 (4 not open). The rule is "go back where you came from".  
On reversal we have the same action on other side.
